Meets 100% of the DRI for 25 vitamins and minerals for adults ages 18+*: 4 341g pouches

HCPCS Code: B4149

NDC Code: 57858-0004-11

USER GUIDE :

- Please check with your medical team for an appropriate transition regimen if switching from a commercial enteral formula to Liquid Hope. You may need to transition slowly over the course of 7-10 days to allow the body time to adapt to differences in the formulas.
- Liquid Hope has a 12-hour ambient room temperature hang time.
- Store unopened formula at room temperature.
- Once opened, the formula can be refrigerated in a sealed container and used within 24 hours.
- Water may be added. If adding water or any liquid, it must be reblended with the product to emulsify in order to prevent separation. Addition of any liquid will reduce hang time.
- The formula can be eaten orally.

*May be appropriate for individuals ages 14-18 at the discretion of a healthcare provider under medical supervision.

USER GUIDE :

- Please check with your medical team for an appropriate transition regimen if switching from a commercial enteral formula to Liquid Hope. You may need to transition slowly over the course of 7-10 days to allow the body time to adapt to differences in the formulas.
- Liquid Hope has a 12 hour ambient room temperature hang time.
- Store unopened formula at room temperature for up to 2 years.
- Once opened, the formula can be refrigerated in a sealed container and used within 48 hours.
- Water may be added. If adding water or any liquid, it must be reblended with the product to emulsify in order to prevent separation.
- The formula can be eaten orally. Many enjoy it when heated on the stove and eaten as a soup, or when mixed with fruit and ice to create a smoothie.

** Medicare, Medicaid and health insurers may ask you to provide a National Drug Code / NDC number for insurance claims, billing or reimbursement purposes. Because our products are whole foods and do not constitute "drugs", we have an Insurance Data Bank and Billing Code that you should use when asked for an NDC number for our products.

Special Notes:

*mL range is given due to the volume being affected by viscosity, altitude, and temperature. For the most accurate measurements please use the grams listed. All nutritional information contained herein is calculated using a 341g/per pouch gram weight measurement.

**DRI% is developed by the Institute of Medicine that refers to set levels of nutrients to meet the nutrient requirements for adults 18 and older. We recommend that you follow your physician's or dietitian's recommendations for the volume of formula necessary to meet both your macro and micronutrient requirements.

Liquid Hope undergoes regular nutritional assessment and lab testing. However, as with any real food product, variations in the nutrient levels can vary depending on time of year, soil, and weather conditions. Although we do our best to provide you with the most accurate nutrient information as possible, if you have a medical condition that requires you to be precise with specific nutrient levels, please discuss the use of this product with your medical team.
